IN MEMORY OF PHILLIP H. MURRAY

The Grim Reaper brings a grievous sense of loss to us, in the death of Phillip H. Murray. He was a potent, but unassuming power for the advancement of his people. He was one of the builders of the foundation upon which must stand the future destiny of the Negro race. He sacrificed his life for the good of all. Those who enjoyed his personal friendship found him to be affable, kind and indulgent and for this he was loved and honored.

He was able, conscientious and energetic. He realized the help he could be to his race and he never faltered in the effort. He was intelligent and broad-minded and a linguist with a power to enforce his ideals. Although in his final days his body was racked with pain from a fatal sickness he never lost courage and fought for his race to the end. "Grant him thine eternal rest, O Lord!"

THINK TWICE BEFORE YOU SPEAK

The unfortunate utterances of a janitor at a gathering of city employees in the office of Mayor Kiel last Saturday is to be regretted. No one can reasonably assume that the speaker was serious in his expressions. It was only the habitude of a misguided tongue by an overenthusiast. It was no doubt given in a spirit of jollity, but, the effect is a bitter experience but a good lesson. Those who assume to represent the opinions of their fellowmen should know their mission and be capable of filling it. Too often are men called upon to represent the race on important affairs who are either not qualified or have not been given time for serious thought. The ability of extemporaneous discussion is a rarity that few men possess. We hope that this burden will not be imposed upon others hereafter. We must "think twice before we speak," we can ill afford to humiliate ourselves.

THE POWER OF EFFICIENCY

The recent promotion of a young colored man to a responsible position, by a large manufacturing firm, clearly exemplifies the power of efficiency. It further proves that efficiency is master over race, color or creed. Efficiency is the basis of progress. It surmounts the obstacles in life, clears the pathway to success and commands the respect of all mankind.

The goal of efficiency cannot be reached by a single bound. It often requires years of struggle, patience and courage, but, as in the case of this young man, its development is accelerated.

Our high schools graduate hundreds of young men and women yearly, who have received the nucleus for advancement. Some continue on through classic and scientific pursuits, some take to the professions while others enter the industrial field. How many, however, fail because of that grueling test, efficiency. How many fall by the wayside because of lack of ambition and determination. How few succeed. There is no room in the path of progressiveness for the slothful, the indolent, the dreamer.

The success of the high school boy mentioned proves that industrial opportunities are open to Negroes. It is a vast field almost unlimited and should be an incentive to inspire energy, ambition and determination to acquire efficiency and by so doing command a higher consideration in the pursuit of life, health and happiness.

E. H. NEWSOME

According to reports, E. H. Newsome, an insurance agent of this city, employed for the past three years by the Clover Leaf Casualty Co. of Jacksonville, Ill., has been transferred by the Company to Indianapolis, Ind., to take charge of the district office of that city, beginning about April 1st.

Until this time, Mr. Newsome will do special work for the Company through Kansas, Missouri, Illinois and Kentucky. The transfer comes as an agreeable surprise to Mr. Newsome because it gives him a broader field to work and it is understood the change is a reward for faithful service, and no doubt he will make good to his new field of labor as he has done in the city.

His wishes to thank his many policyholders and the general public for their loyal support which has made it possible for him to receive such consideration from a company that has thrown down the barrier to colored people in four or five of the Middle States, something that no other white bank and accident company has done. Mr. Newsome states that he is personally supervising the transferring of his debts to responsible and able agents, who he feels will maintain the same integrity and high policy-making that he had.

He will add that there is no reason for leaving a company that has thrown down the barrier to colored people in four or five of the Middle States, something that no other white bank and accident company has done. Mr. Newsome states that he is personally supervising the transferring of his debts to responsible and able agents, who he feels will maintain the same integrity and high policy-making that he had.

SOUTH KINLOCH PARK IS BOOMING

While people who have bought more than one thousand lots in old Kinloch Park have been paying the same prices on the same terms as the colored people who have bought in South Kinloch Park, there is no difference. The colored people have been getting the best of it, because South Kinloch Park is nearer the city and has better street car service.

The good colored people of South Kinloch Park have built themselves a little city of which they have a right to be proud.

With a hundred homes, three churches, and a splendid public school have been built in the last few years. And now we have something new that is going to mean a bigger and better South Kinloch Park.

We have been able to induce a number of white people of good standing to come in with us and co-operate with us to help with their money, their influence and their good will to make South Kinloch Park a bigger and better place for the self-respecting Negro to live and make his home.

We have given these people a big share of our profits in order to get their help, because we believe it is for the benefit of everybody concerned. We have shown them ready to give land to the churches at a nominal price, because we believed they would help South Kinloch Park.

We have always been ready to give land to schools and public institutions at a nominal price—because we believed they would help South Kinloch Park.

And now we are giving land to a certain number of white people of good standing at a nominal price because we believe their money, their influence and their good will are going to help South Kinloch Park.

ST. JAMES A. M. E. CHURCH

A large congregation listened to Dr. Peck Sunday morning in his masterly sermon to the graduates of Sumner High School on "Character Building." As the young people sat, eagerly drinking in every word as it eloquently fell from his lips, he graphically told the story of how God commanded Moses to build the "Ark of the Covenant," and in its construction to use nothing but the best and most costly material. He appealed to the class to emulate the example of Moses and in the formation of their character to use nothing but the best and most costly material will be lasting and helpful to the January Class of 1917.

POULTRY POINTERS

The practice of poultry feeding, while governed largely by circumstance, should be as nearly as possible founded to the regular routine. A hen eats approximately three to four ounces a day, or about six pounds a month. The amount fed each day varies with the season of the year.

The success of egg production depends largely upon the activity of the bird. The reason the Leghorns excel in egg production is because they keep themselves in good physical condition. They exercise.

It has been found that a few thoroughbred birds are more prolific to the interior of poultry houses will destroy completely the common red mite infesting chickens.

The hen that is first out of the roost in the morning, being busy during the day and is the last to go to roost at night is the profitable hen.

It will pay a poultry keeper in nail up cracks in the back, sides and roost of his henhouse. Some birds have the disposition to "break bread," others "defecate" or "defecate." This is especially true of the heavier breeds.

Overfeeding causes inactivity, which will be manifested by no holes being dug in the straw.

The skill of the poultry feeder to be tested by the manner in which he compels the hens to exercise.

It is not the large turkeys that are so profitable, but the ones that are small and are plenty and are easy to care for and are plenty and are easy to care for.

There is no danger of overfeeding, providing the birds are compelled to exercise. The hen that is inactive and shows large tonsils is seldom a good producer.

CORN CRACKS

Best the points of two eggs and add a cupful of milk, a half teaspoonful of salt, a tablespoonful of melted butter and a cupful of corn meal. Beat the mixture with a fork until it is thick and add a cupful of sugar with a tablespoonful of baking powder. Fold in the well beaten whites of the eggs and bake for 25 minutes in a hot oven, using 18 cups.

Goodman Egg Curry

Put two tablespoonfuls of olive oil in a butterable hot saucepan, add four tablespoonfuls of chopped onion, stir until the onion is soft, add a teaspoonful of curry powder, the same amount of salt and pepper and a chopped or finely ground coconut. Add a cupful of the coconut milk and cook slowly one hour. Drain and serve with poached eggs. Baked rice, baked apple, stewed rhubarb or chocolate go well with this dish.

Swedish Crispbread
One cupful of new milk, two and a quarter cupfuls of potato starch, one egg, one tablespoonful of butter and salt and pepper to season. Put the mixture in a bowl and mix with a spoon with boiling water, cook until the potatoes are tender, drain, and mash, add the remaining salt, pepper, and butter, mix well, and then roll, drop by spoonfuls into hot fat.

A CHAKRA JACK GOOD SHOW AT THE BOOKER WASHINGTON THEATRE THIS WEEK

All the acts at the Booker Washington Theatre this week merit the title of "Feats." The combination is strong and a crack-jack good show is the result.

Bith and Brown show the show with an original act that characterizes an old man and an incorrigible kid. The kid part is played by the female member and is a true representation of a disoriented boy who's faint never had no good time like other boys. The team offers some good singing and dancing and close strong.

The Marshall Sisters, Nina and Ethel, have an excellent singing and dancing act that is presented with plenty of vim. Both are finished performers, formerly of the Smart Set Company. Nina is the wife of Salem Tutt Whitaker. Both are finished performers, formerly of the Smart Set Company. Nina is the wife of Salem Tutt Whitaker. The Down Home Band closes the show. The company consists of the Jones family, P. M., Mytta, Billie and Thelma, also Henry Campbell and Edward Jackson, who are St. Louisans. An instrumental act is offered and brass, reed, string, drums and traps are used. Several pieces are played and the blues get a conspicuous tinge. Billie, who is a very small boy, makes an unusual hit featuring "O You Drummer."

His sister Thelma also stars with the drums and cornet. Campbell and Jackson play guitar and banjo and sing. Several good songs are offered and the entire act is rewarded with appreciative applause.

NEXT WEEK AT THE BOOKER WASHINGTON THEATRE
